END ETHNIC CLEANSING AND PROTECT INNOCENT LIVES

The people of Amhara, predominantly living in Ethiopia, are under brutal attack by the government. Drone strikes, massacres, and arbitrary detentions are just a few of the tactics being used in an ongoing ethnic cleansing campaign.

EndHumanitarianCrisis

These violent actions have left millions of civilians displaced, with entire villages destroyed. Food, shelter, and medical care are in critical shortage of supply, and women and children are particularly vulnerable to violence and exploitation

What is happening recently:

Drone Strikes:

- World Council of Churches condemns drone attack that targets civilians in Amhara, Ethiopia (WCC Apr 2025)
- Drone strike kills three civilians, including pregnant women and child, in Amhara (Addis Standard Feb 2025)
- The Ethiopian government has targeted civilian areas like hospitals and markets with drones, spreading terror and destruction (The Hill, Oct. 2024).

Massacres:

- In late October, over 100 civilians, mostly women and children, were massacred in North Showa by Ethiopian forces (Al Ahram, Oct. 2024).

Arbitrary Detentions:

- Thousands of Amharas journalists, activists, MPs, elders & youth, have been detained, tortured, or killed without due process (Amnesty International, Nov. 2024).

Military Terror:

- Ethiopian forces continue to terrorize and kill civilians, showing disregard for human life (Daily News Egypt, Oct. 2024).
